

Draft NMAAHC Effects Analysis Matrix*	Plinth Scheme	Plaza Scheme	Pavilion Scheme	Blended Scheme
	 <p>Top of Corona: 118'-0" Top of Penthouse: 132'-6"</p>	 <p>Top of Corona: 118'-0" Top of Penthouse: 133'-9"</p>	 <p>Top of Corona: 118'-0" Top of Penthouse: 132'-6"</p>	 <p>Top of Corona: 118'-0" Top of Penthouse: 132'-6"</p>

\*This Effects Analysis Matrix is derived from the Design Principles developed specifically by the Smithsonian – through consultation with interested parties, including the National Capital Planning Commission, the U.S. Commission of Fine Arts, the D.C. Historic Preservation Office, and the Advisory Council on Historic Preservation – to guide the design process for the proposed National Museum of African American History and Culture. The Design Principles summarize the analysis of the historic character of the National Mall, the selected museum site, and the surrounding urban context and articulate parameters for avoiding or minimizing the adverse effects of new construction.

- ★★★ Major Effect: The serious adverse effect would diminish overall integrity, or alter a character-defining feature(s) of the National Register eligible/listed property.
- ★★ Moderate Effect: The adverse effect is apparent and would diminish overall integrity, or would alter a character defining-feature(s) of the National Register eligible/listed property.
- ★ Minor Effect: The adverse effect is detectible, but slight, and would minimally diminish overall integrity, or affect the character-defining feature(s) of the National Register eligible/listed property.

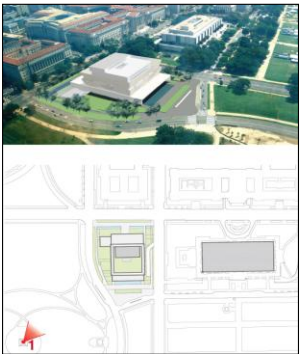

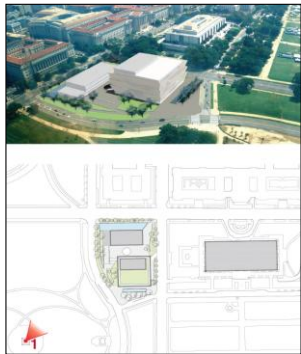

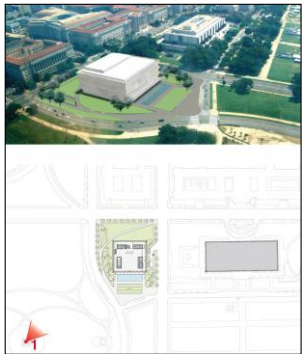

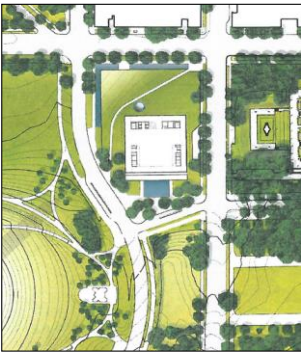

General Composition of the National Mall					Avoidance/Minimization/Mitigation
The character, history, and existing hierarchies of the monumental core as it has evolved through seminal plans, most notably the L'Enfant Plan and the McMillan Plan, but also including the Victorian-era and mid-20th-century plans.					
The long views within the National Mall.					
The distant views from higher locations such as Arlington Cemetery, the Old Post Office tower, the Washington Monument, and from the air.					
The panoramic views that open and widen on the approach to the Washington Monument Grounds from the National Mall or the Ellipse.					
The cross-axial spatial organization of the National Mall, marked by the Washington Monument at its crossing.					
The "hinge" site within the larger composition of the National Mall where the surrounding frame of buildings reaches its closest approach to the Washington Monument

- ★★★ Major Effect: The serious adverse effect would diminish overall integrity, or alter a character-defining feature(s) of the National Register eligible/listed property.
- ★★ Moderate Effect: The adverse effect is apparent and would diminish overall integrity, or would alter a character defining-feature(s) of the National Register eligible/listed property.
- ★ Minor Effect: The adverse effect is detectable, but slight, and would minimally diminish overall integrity, or affect the character-defining feature(s) of the National Register eligible/listed property.

Context of the Washington Monument Grounds					Avoidance/Minimization/Mitigation
The scale, design character, and preeminence of the Washington Monument.					
The naturalistic topography of the Washington Monument Grounds and the distinct characteristics of this historic environment, including the peripheral "flats" and central mound.					
The distinctive characteristics of the historic environment of the Washington Monument Grounds including the Monument Lodge, the Bulfinch Gateposts, and the curvilinear pathways.					
The definition, character, and views of the Washington Monument Grounds as seen and experienced from within the reservation as a whole.					
The surrounding larger landscape and fluidity of movement across the site.					
Relationship to Adjacent Architectural and Urban Context					
The site's relation to each of its adjacent contexts – the National Mall, the Washington Monument Grounds, and the urban grid of the adjacent city.					
The site's unique position at the western end of the sequence of museum buildings facing the National Mall.

- ★★★ Major Effect: The serious adverse effect would diminish overall integrity, or alter a character-defining feature(s) of the National Register eligible/listed property.
- ★★ Moderate Effect: The adverse effect is apparent and would diminish overall integrity, or would alter a character-defining-feature(s) of the National Register eligible/listed property.
- ★ Minor Effect: The adverse effect is detectable, but slight, and would minimally diminish overall integrity, or affect the character-defining feature(s) of the National Register eligible/listed property.

					Avoidance/Minimization/Mitigation
The prevailing height and the prevailing setback of the primary building volumes (not terraces) of the museums along the National Mall and Constitution Avenue.					
Compatibility of all four facades and the roof, service/support functions, and perimeter security to adjacent architectural and urban context.					
The important non-cardinal views and directions of approach of the corner street crossings.					
The important non-cardinal views and directions of approach of the historic National Mall pathways.					
The important non-cardinal views and directions of approach of the diagonal relationships with the Washington Monument, the Ellipse, and the Old Post Office.
